Professional Summary

IT Support Engineer with 2+ years of hands-on experience supporting Windows environments, networking, and device deployments across multi-site organisations. CompTIA Network+ certified and currently pursuing Microsoft Azure Administrator (AZ-104). Experienced in Active Directory, Microsoft 365 administration, and large-scale endpoint deployment. Skilled in troubleshooting complex technical issues, automating administrative tasks with PowerShell, and delivering reliable IT support to large user environments. Seeking to transition into an MSP role to further develop cloud and systems expertise.

Technical Skills

- Windows Server, Active Directory, Azure AD
- Microsoft 365 administration
- Networking (DNS, DHCP, VLANs, VPNs, switching)
- Device deployment (MDT, SCCM, PDQ)
- MDM (Mosyle, Jamf, Apple School Manager)
- Virtualisation (VMware, Hyper-V)
- Backup & Disaster Recovery (Veeam)
- Scripting & Automation (PowerShell, JavaScript)
- End-user support (remote & onsite)

Professional Experience

eduSTAR.TSS Program (Multiple School Sites)

Melbourne, VIC

Specialist Technician

Sep 2023 - Oct 2025

- Delivered Level 1/2 IT support to over 1,600 users across multiple sites, resolving hardware, software, and network issues.
- Deployed and configured 200+ devices annually using MDT/WDS imaging and automated deployment tools.
- Supported Windows Server infrastructure including Active Directory, Group Policy, DNS, DHCP, and WSUS.
- Implemented an MDT deployment solution, reducing device provisioning time by 50%.
- Developed a PowerShell script to automate Active Directory user account creation, scheduled via Task Scheduler to streamline onboarding and reduce 20% manual administrative effort.
- Diagnosed and resolved network issues involving VLAN segmentation, switching, DNS, and DHCP across multi-site environments.
- Assisted with network upgrades including VLAN segmentation and Cisco switch replacements.
- Supported migration to Zscaler Zero Trust platform improving network security.
- Managed large MDM environments using Mosyle and Apple School Manager.
- Maintained backup and disaster recovery systems using Veeam.
- Created technical documentation and troubleshooting guides to support IT operations.
- Provided remote and onsite support ensuring minimal downtime and strong user satisfaction.

Software Developer – Seta International

Hanoi, VietNam

Software Developer intern

Sep 2021 – Jun 2022

- Developed web applications using JavaScript, ReactJS, Redux, and NodeJS.
- Improved application performance using optimisation techniques including lazy loading and code splitting.
- Optimized website performance by implementing lazy loading, resulting in a 20% increase in page speed.

Technical Projects

- Built and maintained a home lab environment using VirtualBox and Hyper-V virtualization.
- Configured Active Directory domain services with DNS and DHCP for infrastructure testing.
- Implemented VLAN segmentation and firewall rules for network isolation.
- Deployed Linux and Windows servers to test web hosting, containers, and remote access.
- Experimenting with Azure cloud infrastructure including virtual networks, virtual machines, and identity management while preparing for AZ-104.

Education

Swinburne University of Technology

Bachelor of Information And Communication Technology | Minor in Software Technology

Melbourne, Victoria

December 2022

- Awards/Honors: Swinburne Excellence Scholarship.

Certifications

- CompTIA Network+
- CompTIA A+
- Microsoft Azure Administrator (AZ-104) - In Progress
